12. The Certificate of Registration must be returned to the SBAP when the horse is exported, dies or is destroyed and as prescribed by the rules and regulations of the SBAP. If it is lost, the SBAP must be notified immediately and a duplicate copy must be obtained.
13. The Certificate of Registration must be transferred to the new owner when the horse is sold, donated, etc.; and, such transfer should be recorded in the appropriate section, reported to and endorsed by the SBAP.
14. The Certificate of Registration is issued strictly for the purpose described thereat and is not valid for use other than that for which it is intended stated. Likewise, any alteration, omission, correction, etc. not officially endorsed by the SBAP automatically invalidates the Cert. of Registration.
15. The Certificate of Registration is not valid without the signatures of both the Registrar and Keeper of the Phil. Stud Book and without the official seal of the SBAP.

**Sec. 15 - DNA/BLOOD-TYPING & PARENTAGE VALIDATION OR VERIFICATION**

1. As an IABRW condition of entry into a 'Thoroughbred' Stud Book and a major ISBC requirement for international approval of a Stud Book; a policy of Blood-Typing/DNA Testing and Parentage Validation/ Verification horses shall be adopted by the SBA of the Phils. for all horses prior to their inclusion in the Phil. Stud Book (official records).
2. For this purpose, a DNA/BT/PV strategy or program shall be implemented which would involve the following:
  - a) TRANSITION PERIOD / INITIAL PHASE –DNA/Blood-Typing of all existing Breeding Animals (bloodstock) that have been registered with the SBA of the Phils.;to include:
    - All local(ly)-bred Stallions and Broodmares that are registered with the SBA of the Phils.and that are eligible for inclusion in the PSB Breeders/Owners of eligible horses shall be informed by the SBA of the Phils.).
    - All imported horses that are registered with the SBA of the Phils. for purposes of breeding(Stallions and Broodmares) and that have NOT been DNA/BT'd and/or PV/V'd abroad prior to their export to the Phils.
  - b) REGULAR PERIOD / ROUTINE IMPLEMENTATION PHASE - After such period determined by the SBA of the Phils., when more than half the existing breeding population of horses that are eligible for inclusion in the PSB; and, concurrent with the implementation of the revised/amended rules of the SBA of the Phils., DNA/Blood-Typing and/or Parentage Validation/Verification Regulations shall take effect and compulsory testing shall be a routine requirement during the registration procedure for all horses that are eligible for inclusion in the Stud Book (PSB) official records; to include:

The PRINCIPAL RULES and REQUIREMENTS of the SBAP

- All Stud Book eligible Foals that are registered with the SBA of the Phils. during the Foal Registration process.
  - All other Stud Book eligible horses that are registered with the SBA of the Phils. for the purpose of breeding (Stallion and/or Broodmare Registration process).
3. All existing Stallions born in the Philippines must be DNA tested.
  4. Unless otherwise decided by the ISBC, the SBA of the Phils. reserves the exclusive right to determine which horses are eligible for inclusion into the PSB official records based on the compliance with the DNA/BT/PV/V Rules and Regulations; and, is the proper authority to accept/reject any horses in the PSB. Such may only be appealable for final decision to the ISBC.
  5. During the Transition Period/Initial Phase of the DNA/BT/PV/V program, the SBA of the Phils. shall make every effort to inform breeders/owners which horses must be DNA/BT'd (list of names of horses and respective owners).
  6. It shall be the responsibility of the breeder/owner to submit an application for Inspection and DNA/Blood-Typing together with the corresponding fees with the SBA of the Phils.
  7. The application for Inspection and DNA/Blood-Typing is also a contract of agreement
  8. The SBA of the Phils. shall advise the breeder/owner/his representative when his horse/s have been scheduled for inspection and blood/hair sampling/collection; during which the breeder/owner/his representative must make the necessary preparations and arrangements for the SBA Veterinarian's visit.
  9. Upon completion of the Inspection and DNA/Blood Sampling process, the SBA Vet shall issue the Owner/Breeder/his representative a copy of the Identification Cert. and DNA/BT'g Form which must be presented to the SBA of the Phils., after testing has been completed and/or the horse qualifies as an offspring of its claimed parents, in order that the Certificate of Registration for the said horse may be issued showing the fact that it had been DNA/BT'd/PV/V'd.
  10. All stud book eligible foals must be parentage validated/verified before they are finally accepted into the PSB official records.
  11. All Stud Book eligible Foals whose analysis of the DNA/BT'g result has shown that the declared sire and dam cannot be excluded as the parents, the SBA of the Phils. shall issue a Cert. of Foal Reg'n with the fact that the foal has qualified based on DNA/PV/V and/or has been DNA/BT'd and these foals shall be recorded in the PSB under their dams with the entry 'Produce Accepted.'
  12. During the Regular Period/Routine Implementation Phase of the DNA/BT/PV/V program, returns cannot be accepted from a stallion/broodmare which has not been DNA/bloodtyped. During such period as shall be determined by the SBAP said stallions/broodmares which have not been applied for DNA/BT'g shall be dropped out or excluded from the PSB official records and entered into the Non-Stud Book Register.

## Sec. 16 – MICROCHIP

1. Microchip will be used as an additional tool for horse identification and will not in any way replace the standard procedure for identification (in agreement with the International Stud Book Committee decision at the 3<sup>rd</sup> Asian Stud Book Conference on January 27, 1999 held at Landmark, Macau). This will be an additional requirement for registration.
2. The microchips should meet ISO 11784/11785 standards, which are the accepted international standards.
3. Initially, all foals born starting 2005 are included in the first phase of the Microchip Program and will be implemented upon the application for registration in 2007. An application form for microchip implantation will be filled-up by the owner or his representative. Once filed and fees are settled, the horse will be scheduled for implantation on or before sample collection for Horse Identification and Parentage Validation Program.
4. Horse breeders/ owners are required to have their horses properly branded before inspection and implantation for foals born in 2005.
5. As the programs goes to its second, third and pre-weaning phases of implementation (foals born in 2006, 2007 and 2008 respectively) branding will be required later in foal registration.
6. PHILRACOM staff (Veterinarians) will be utilized during implantation of the microchip, as all identifying marks will be noted. This will coincide with taking the marks, coat color, sex, dam and sire in the Identification Certificate. The microchip number will then be included in the Identification Certificate.
7. A test scan will be done before and after implantation of the microchip to verify whether the chip (as well as the scanner) is working properly.
8. Implantation of the microchip will be done in the presence of the owner or his representative at left mid-crest of the nuchal ligament using a syringe-like dispenser (included the kit). Sedation may be necessary especially with hyperactive horses to avoid trauma and proper implantation of the microchip.
9. When implantation coincides with the hair/blood collection for DNA and/or BT-PV Program, inspection will be done as follows: (a) the neck will be scanned to double check whether the horse has microchip or not, (b) if the horse has no microchip, rules from 3-8 will apply.
10. No horse will be allowed to be registered without a microchip implanted (when the Mirochip Program resumes). Microchip details will be included on the passport, registration and export certificates.
