A horse or mare may be considered eligible for inclusion or admission to the Philippine Stud Book provided that it must completely satisfy the qualification required in I below; and, it must follow the conditions and procedures contained in II to III.

I. DEFINITION OF A THOROUGHBRED

A Thoroughbred is a horse that is recorded in the Thoroughbred Stud Book of the country of its foaling, that Stud Book having granted Approved status by the International Stud Book Committee at the time of its official recording.

A. To be eligible to be registered by the Philippine Stud Book a horse must be able either

OR

2. To prove satisfactorily (8) eight recorded crosses consecutively with horses qualified as in the category 1 above, including the cross of which it is the progeny, and to have satisfied the performance and approval conditions as set out for foals in sections B. 2 and 3 below.

For the purposes of the Philippine Stud Book, horses in categories 1 and 2 above are designated "Thoroughbred."

B. A horse may be promoted from the Non-Thoroughbred Register and registered in the Appendix to the Philippine Stud Book only when the following conditions are all satisfied.

1. The pedigree of the horse demonstrates eight Thoroughbred crosses consecutively including the cross of which it is the progeny.
2. The pedigree of the horse contains animals that can show such

performances in races open to Thoroughbreds, in both the Thoroughbred and non-Thoroughbred sections of its pedigree, as to warrant its assimilation with Thoroughbreds.

II. CONDITIONS FOR ELIGIBILITY FOR REGISTRATION OF FOALS BY THE SBAP

No horse may be considered eligible for foal registration and eligible for inclusion in the PSB unless the following conditions set forth by the SBA of the Philippines (SBAP) have all been duly satisfied.

A. DAM AND SIRE REGISTRATION

No foal may be considered eligible for registration as such unless both its sire and dam have been previously accepted and registered for the purpose of breeding (stallion, broodmare) with the SBAP. The only exception to this condition is a foal which was imported-in-utero, (known also as "island-born foals") whose dam was imported in-foal or with covering abroad and has been properly registered with the SBAP; and, whose sire was not imported but is duly registered in an ISBC-approved Stud Book. Identity documents (Certificates of Registration/ Passports) shall be issued by the SBAP concerning each broodmare or stallion registered.

B. SERVICE TO PRODUCE AN ELIGIBLE FOAL

No foal may be considered eligible for registration as such unless: (1) it is a product of a 'natural service;' (or covering which is the physical mounting of a mare by a stallion. This natural service can, as authorized by the Stud Book Authority of the Philippines, include the immediate reinforcement of the stallion's service or cover by a portion of the ejaculate produced by that stallion during that service or cover of that same mare) and, (2) a natural gestation took place in and delivery was from the body of the mare in which the foal was conceived. The use of artificial insemination, embryo transplant, cloning or any other form of genetic manipulation not herein specified, is absolutely forbidden and no foal conceived as such may be registered by the SBAP.

No foal which was

imported-in-utero may be considered eligible for registration as such unless the official Covering Certificate issued by the SBA of the country of covering has been duly received by or directly forwarded to the SBAP. Particulars of the covering of a mare by a stallion should be certified by the stallion proprietor on the official Certificate of Covering, certifying to the SBAP and to the mare owner:

2. that the identity of the mare was verified against her identity documents (Certificate of Broodmare Registration or Passport);
3. that the service was natural and that artificial insemination was not used.

D. STUD BOOK RETURN / REPORT OF BIRTH OF LIVE FOAL

No foal may be considered eligible for registration as such unless the Stud Book Return (SBAP Form No. 2), officially showing or reporting the birth of a live foal, has duly been lodged with the SBAP in the year of foaling. Particulars of the birth of a foal should be certified by the mare owner to the SBAP on the official form, showing:

2. the name of the covering stallion responsible for the foal;
3. the date of birth, colour and sex of the foal;

F. IDENTIFICATION, BLOODTYPING/DNA TESTING, PARENTAGE VERIFICATION/VALIDATION

No foal may be considered eligible for registration as such unless it has been inspected and its identity has been duly established, verified or confirmed by the SBAP or its official representative. In addition, no foal may be considered eligible for registration as such unless its blood/DNA type has been determined/recorded and its parentage has been verified through testing procedures and methods conducted or performed by a duly qualified and internationally-recognized laboratory contracted/designated by the SBAP.

1. A horse is not eligible to be recorded in the PSB unless it has been properly 'identified' (narrative and diagrammatical markings/description taken); or, unless its identity has been verified or confirmed by the SBAP.

 - All local(ly)-bred Stallions and Broodmares that are registered with the SBA of the Phils.and that are eligible for inclusion in the PSB Breeders/Owners of eligible horses shall be informed by the SBA of the Phils.).
 - All imported horses that are registered with the SBA of the Phils. for purposes of breeding(Stallions and Broodmares) and that have NOT been DNA/BT'd and/or PV/V'd abroad prior to their export to the Phils.
 - b) REGULAR PERIOD / ROUTINE IMPLEMENTATION PHASE - After such period determined by the SBA of the Phils., when more than half the existing breeding population of horses that are eligible for inclusion in the PSB; and, concurrent with the implementation of the revised/amended rules of the SBA of the Phils., DNA/Blood-Typing and/or Parentage Validation/Verification Regulations shall take effect and compulsory testing shall be a routine requirement during the registration procedure for all horses that are eligible for inclusion in the Stud Book (PSB) official records; to include:

The PRINCIPAL RULES and REQUIREMENTS of the SBAP

- All Stud Book eligible Foals that are registered with the SBA of the Phils. during the Foal Registration process.
 - All other Stud Book eligible horses that are registered with the SBA of the Phils. for the purpose of breeding (Stallion and/or Broodmare Registration process).
3. All existing Stallions born in the Philippines must be DNA tested.
 4. Unless otherwise decided by the ISBC, the SBA of the Phils. reserves the exclusive right to determine which horses are eligible for inclusion into the PSB official records based on the compliance with the DNA/BT/PV/V Rules and Regulations; and, is the proper authority to accept/reject any horses in the PSB. Such may only be appealable for final decision to the ISBC.
 5. During the Transition Period/Initial Phase of the DNA/BT/PV/V program, the SBA of the Phils. shall make every effort to inform breeders/owners which horses must be DNA/BT'd (list of names of horses and respective owners).
 6. It shall be the responsibility of the breeder/owner to submit an application for Inspection and DNA/Blood-Typing together with the corresponding fees with the SBA of the Phils.
 7. The application for Inspection and DNA/Blood-Typing is also a contract of agreement
 8. The SBA of the Phils. shall advise the breeder/owner/his representative when his horse/s have been scheduled for inspection and blood/hair sampling/collection; during which the breeder/owner/his representative must make the necessary preparations and arrangements for the SBA Veterinarian's visit.
 9. Upon completion of the Inspection and DNA/Blood Sampling process, the SBA Vet shall issue the Owner/Breeder/his representative a copy of the Identification Cert. and DNA/BT'g Form which must be presented to the SBA of the Phils., after testing has been completed and/or the horse qualifies as an offspring of its claimed parents, in order that the Certificate of Registration for the said horse may be issued showing the fact that it had been DNA/BT'd/PV/V'd.
 10. All stud book eligible foals must be parentage validated/verified before they are finally accepted into the PSB official records.
 11. All Stud Book eligible Foals whose analysis of the DNA/BT'g result has shown that the declared sire and dam cannot be excluded as the parents, the SBA of the Phils. shall issue a Cert. of Foal Reg'n with the fact that the foal has qualified based on DNA/PV/V and/or has been DNA/BT'd and these foals shall be recorded in the PSB under their dams with the entry 'Produce Accepted.'
 12. During the Regular Period/Routine Implementation Phase of the DNA/BT/PV/V program, returns cannot be accepted from a stallion/broodmare which has not been DNA/bloodtyped. During such period as shall be determined by the SBAP said stallions/broodmares which have not been applied for DNA/BT'g shall be dropped out or excluded from the PSB official records and entered into the Non-Stud Book Register.

Sec. 16 – MICROCHIP

1. Microchip will be used as an additional tool for horse identification and will not in any way replace the standard procedure for identification (in agreement with the International Stud Book Committee decision at the 3rd Asian Stud Book Conference on January 27, 1999 held at Landmark,

The PRINCIPAL RULES and REQUIREMENTS of the SBAP

- Macau). This will be an additional requirement for registration.
2. The microchips should meet ISO 11784/11785 standards, which are the accepted international standards.
 3. Initially, all foals born starting 2005 are included in the first phase of the Microchip Program and will be implemented upon the application for registration in 2007. An application form for microchip implantation will be filled-up by the owner or his representative. Once filed and fees are settled, the horse will be scheduled for implantation on or before sample collection for Horse Identification and Parentage Validation Program.
 4. Horse breeders/ owners are required to have their horses properly branded before inspection and implantation for foals born in 2005.
 5. As the program goes to its second, third and pre-weaning phases of implementation (foals born in 2006, 2007 and 2008 respectively) branding will be required later in foal registration.
 6. PHILRACOM staff (Veterinarians) will be utilized during implantation of the microchip, as all identifying marks will be noted. This will coincide with taking the marks, coat color, sex, dam and sire in the Identification Certificate. The microchip number will then be included in the Identification Certificate.
 7. A test scan will be done before and after implantation of the microchip to verify whether the chip (as well as the scanner) is working properly.
 8. Implantation of the microchip will be done in the presence of the owner or his representative at left mid-crest of the nuchal ligament using a syringe-like dispenser (included the kit). Sedation may be necessary especially with hyperactive horses to avoid trauma and proper implantation of the microchip.
 9. When implantation coincides with the hair/blood collection for DNA and/or BT-PV Program, inspection will be done as follows: (a) the neck will be scanned to double check whether the horse has microchip or not, (b) if the horse has no microchip, rules from 3-8 will apply.
 10. No horse will be allowed to be registered without a microchip implanted (when the Microchip Program resumes). Microchip details will be included on the passport, registration and export certificates.
